DEVELOPMENT OF THE STATE TEACHERS COLLEGE

The State Teachers College at Salisbury was located on the Eastern Shore in response to a long-felt need for a teacher-training institution to care for the educational interests of the section. It has now been serving the people of Maryland since 1925 and is firmly established as an indispensable part of the State's public school system.

The school was authorized by the Legislature in 1922. The Building Commission, then created, selected for the location of the new institution a site containing twenty-nine acres, ideally located, near Salisbury. The school is now within the city limits, being included in the territory annexed by act of the Legislature of 1927. After initiating a building program and completing certain units of the college plant, the Commission went out of existence, and the rest of the building was done under the direction of the State Board of Education.

The college, accredited by The American Association of Colleges for Teachers Education, has developed into a center of educational activities, especially for the Eastern Shore.

LOCATION OF THE COLLEGE

Salisbury, chosen by the General Assembly of 1922 as the location for the needed new teacher-training institution, is a modern, progressive city, with cultured people who do their part to make life at the State Teachers College pleasant and profitable. Situated at the head of navigation on the Wicomico River, with hard surfaced highways radiating in every direction, Salisbury is easily accessible from all parts of Maryland. Its lakes and river give it a natural setting of rare beauty. Maryland's sea-side resort, Ocean City, is only thirty miles away. Wilmington, Philadelphia, and Baltimore are within easy motoring distances. The Pennsylvania Railroad trunk-line from New York to Norfolk and the South passes through Salisbury. De luxe buses run on regular schedule to all parts of the peninsula.

Residents of the Western Shore may select any of five routes to Salisbury: by train via Baltimore and Wilmington; by motor car via Baltimore; Elkton, Maryland; Middletown, Delaware; and Dover, Delaware; via Sandy Point-Matapeake ferry, thence by motor car or Red Star bus to Salisbury; by the Red Star Motor Bus, which furnishes through passenger service from Baltimore to Salisbury by way of the Matapeake ferry; or via All American Airways from Baltimore. Full details concerning schedules will be furnished upon request.

The College is located between Camden Avenue and Salisbury Boulevard at the junction of College and Camden Avenues. The grounds comprise attractive lawns, with flowers, trees, shrubbery, and evergreens, as well as ample playground areas and gardens. A distinctive feature is the athletic field, where training in all forms of sport is given.

THE COLLEGE PLANT

The group of buildings as originally planned has been in use since 1932. The buildings, under one roof, contain the auditorium, classrooms, gymnasium, business and registrar's offices, and women's dormitory; the north wing and connecting wing, including library, little theatre and faculty offices; and the south wing and connecting wing, containing the social room,

dining hall, service room, kitchen, infirmary, and additional dormitory rooms for students and guests. The demonstration school, comprising five classrooms, library, and teachers' offices, is at the rear of the north wing. A Student Activities Center on the lower floor contains the bookstore, post office, grill, soda fountain, and facilities for informal recreation.

The State Planning Commission recommended a plant expansion program at the teachers' colleges in order that an adequate number of teachers might be trained to meet the needs of an increasing population. In 1950, twenty-five additional acres immediately adjacent to the college on the south were purchased. The land included two wooded acres, and a residence in which the offices of the President and his administrative staff are now located. The first building of the long term building program to be constructed was a men's dormitory, opened in the fall of 1951. The construction of a new demonstration school is expected to be completed in the spring of 1953.

LIVING ACCOMMODATIONS

The College has rooms for boarding women students on the second and third floors of the north wing of the main building. Baths, laundries, and recreation rooms are conveniently located on each floor. Each room accommodates two students, and has a lavatory with hot and cold running water.

The men's dormitory consisting of game room, lounge, supervisor's suite, and fifty-one rooms for one-hundred-two men students has been completed, and is now being occupied.

Boarding students are expected to live in the dormitories, and are subject to the disciplinary control of the college.

Students enjoy the comforts and conveniences of a social room and dining hall in the main building which, in their decorations and furnishings, are superior to those found at many institutions. Every opportunity is afforded students to enjoy, under helpful and sympathetic guidance, approved social, moral and religious surroundings.

ADMISSION REQUIREMENTS

1. GRADUATION FROM AN APPROVED HIGH SCHOOL:

Graduation from a standard public high school or accredited nonpublic secondary school is required for entrance to the College.

2. RECOMMENDATIONS BY THE HIGH SCHOOL PRINCIPAL AND BY THE SUPERINTENDENT:

The recommendation of the principal of the high school from which the applicant has graduated and also the recommendation of the superintendent in whose area the school is located are required.

Graduates of nonpublic Maryland schools and out-of-State schools who are admitted must have the recommendation of

the principal and must have completed a well-organized curriculum totaling 16 units and including the following constants required for graduation from any Maryland public high school;

Subject	Units
English	4
Mathematics	1
Social Sciences, of which 1 unit must be in United States History	2
Science	1
Acceptable electives	8
Total.....	16

3. SCHOLARSHIP:

The standards for students entering from Baltimore City and from the counties, though based on different marking systems, are approximately the same and are as follows:

County students—The Scholarship standard set by the State Board of Education as the basis for certification by the high school principal for college entrance requires that the applicant shall have made a grade of A or B in at least 60 percent of the college entrance courses and a grade of C or higher in all other college entrance courses taken during the last two years of high school. Students not meeting this average may be considered for admission on the recommendation of the high school principal and of the superintendent of schools.

Baltimore City students—The agreement with the State Department of Education on the scholarship standards recommended by the Board of School Commissioners of Baltimore City as the basis of certification for admission to the Teachers Colleges is that the student must have made an average of 80 percent in the last two years of high school work. Students with averages between 75 and 80 may be considered for admission on the recommendation of the high school principal and the superintendent of schools.

4. HEALTH:

A thorough physical examination by the College physician is required upon admission. Teacher training students must pass a physical examination administered immediately preceding graduation to be eligible for State Retirement benefits provided Maryland teachers.

5. CITIZENSHIP:

According to a By-law passed by the State Board of Education, only citizens of the United States shall be employed in the public school system in the counties or admitted to the State Teachers Colleges.

6. ADVANCED STANDING:

An applicant for advanced standing who presents a record of honorable dismissal from the college attended may be allowed credit for college work completed in so far as the work approximates courses offered at the Teachers College. No transfer credit will be allowed for courses in which the applicant has made D grades. The advanced standing is provisional until the student has established a satisfactory record in the College.

A transfer student must earn the last year of credit (thirty-two semester hours) at the Teachers College which awards the degree. If the applicant has graduated from a two-or three-year curriculum at one of the Maryland State Teachers Colleges the requirements may be reduced to not less than two summers of ten weeks each, or one semester. Summer school courses at the College when offered may be counted toward the last year of the requirement for the degree.

7. TRANSFER FROM ONE MARYLAND TEACHERS COLLEGE TO ANOTHER:

A properly qualified student may enter any one of the three Maryland Teachers Colleges, but, when a choice of schools has been made, no transfer to another Maryland Teachers College shall be permitted under any conditions or at any time, except by written permission from the State Superintendent of Schools after the request for transfer has been acted on by the State Board of Education. A student who has failed in one or more courses will by that fact be debarred from obtaining a transfer.

THE PLEDGE TO TEACH IN THE STATE OF MARYLAND

Every student beginning the third year at the State Teachers College must have signed the pledge to teach two years in Maryland immediately following graduation. If only the last year's work is taken at the College, the pledge to teach shall cover one year.

REQUIREMENTS FOR DEGREES

To qualify for the degree of B.S. in Elementary Education, a student must earn credit for four full years of work, or 128 semester hours, including the following courses:

Subject	Semester hours
Art	6 6
Education:	
Elementary School Curriculum Materials and Methods	11
History and Philosophy of Education	3
Children's Literature	3
Directed Teaching	16
Principles and Observation	3
	36

<i>Subject</i>	<i>Semester hours</i>	
English:		
American Literature	3	
Composition	6	
English Literature	6	
Speech	3	18
Geography	6	6
Mathematics	3	3
Music	6	6
Physical and Health Education	9	9
General Psychology; Child Growth and Development or Educational Psychology	6	6
Science: Physical and Biological	14	14
Social Sciences:		
History of Europe	6	
History of the United States	6	
Elective	6	18
Elective*	6	6
Total		128

* Not more than 9 semester hours in electives will be allowed in any one subject.

To qualify for the degree of B.S. in Junior High School Education, a student must earn 128 Semester hours credit, including the following courses:

Art	3	3
Education:		
Junior High School Curriculum	9	
History and Philosophy of Education	3	
Juvenile Literature	3	
Principles and Observation	3	
Directed Teaching	16	34
English:		
American Literature	3	
Composition	6	
English Literature	6	
Speech	3	18
Geography	6	6
Mathematics	6	6
Music	3	3
Physical and Health Education	9	9
General Psychology; Child Growth and Develop- ment or Educational Psychology	6	6
Science: Physical and Biological	14	14

<i>Subject</i>	<i>Semester hours</i>
Social Sciences:	
History of Europe	6
History of the United States	6
Elective	6
	18
Elective*	11
Total	128

* Not more than 9 semester hours in electives will be allowed in any one subject.

STANDARDS OF WORK

A minimum average of "C" in the four years' work, and a grade of at least "C" in directed teaching are required for graduation. No student will be graduated with a semester grade of "F" in a required subject. Any student who accumulates a semester grade of "F" in twelve hours' work, or any student who fails to pass the minimum of one-half the points for which he completes registration in any one semester, will be dropped from the regular enrollment of the college. Such a student, however, may be placed on probation for the following semester. Probation is lifted when the student shows satisfactory improvement in his work. A probationary student who fails to show such improvement will be asked to leave the college. Probationary status indicates uncertainty as to the student's probable success.

STUDENT LOAD

Sixteen semester hours constitutes the normal student load for a semester and only upon approval of a faculty committee may the student register for a heavier schedule. No student is permitted to carry more than eighteen hours in any one semester.

Ten semester hours constitutes the normal student load for a ten-week summer session and only upon approval of a faculty committee may a student register for as many as eleven or twelve semester hours.

EXPENSES

Tuition for Maryland Students

A uniform fee of \$100.00 for tuition for each academic year is charged transfer students at each of the State Teachers Colleges. This amount includes the charges for registration and for health and laboratory services. No tuition is charged teacher training students signing the pledge to teach two years following graduation.

Cost for Maryland Resident Students

The cost for a Maryland, boarding, transfer student for the regular academic year is \$346—\$216 for room and board, \$100

for tuition, and \$30.00 for fees as described below. All expenses are payable in two installments in advance; \$188.00, including fees, on the opening day of the first semester, and \$158.00 at the beginning of the second semester.

Cost for Out-of-State Students

Students who are not legal residents of Maryland and who meet the entrance requirements may be admitted. Such students pay all the fees charged Maryland transfer students, plus a surcharge of \$100 per academic year.

The Breakage Fee

A breakage or property deposit of \$5.00 is required of each student entering the college for the first time. This fee is refunded when the student graduates or withdraws, provided he has no charges against his record.

The Activities Fee

Receipts from the \$15.00 individual student activities fee belong to the student body, and are used for class dues and for furthering such activities as student publications, dramatics, and the Student Government Association. There will be no refund of the activities fee after the first two weeks following registration.

Athletic Fee

An athletic fee of \$10.00 per year is charged each full time student. This fee is used only for travel, referee fees and for consumable supplies.

Summary of Expenses

MARYLAND RESIDENTS:	Semester		
	I	II	
Tuition	\$ 50.00*	\$ 50.00*	
Board and room	108.00	108.00	
Activities fee	15.00		
Athletic fee	10.00		
Breakage fee	5.00		
Totals	\$188.00	\$158.00	\$346.00

OUT-OF-STATE RESIDENTS:

Tuition in addition to fees shown above: \$ 50.00 \$ 50.00 \$446.00

* Required of transfer students; i.e., students enrolled for general subjects leading to an Associate in Arts degree at the end of two years. Not charged teacher training enrollees, who are Maryland residents.

Late Registration Fee

Any student who registers after the date of registration named in the calendar is required to pay the late entrance fee of \$2.00.

Textbooks and Gymnasium Uniforms

Textbooks, the cost for which will approximate \$25.00 each semester, may be purchased from the college book store.

For purposes of economy and uniformity in appearance and quality of materials, the college requires all students to purchase regulation athletic uniforms. These are procured by the college book store at a minimum cost to the student.

Transcript of Record

One transcript of a student's record will be issued free of charge. A charge of \$1.00 is made for a second and each subsequent transcript.

Delinquent Accounts

No student delinquent in payments to the college will receive final grades, or have a transcript of record issued.

REFUNDS

As a basis for making refunds to students who withdraw, the following plan is used:

DAY STUDENTS:

1. A day student who withdraws within two weeks of his initial enrollment shall have refunded the tuition charge for that semester less \$10.00.
2. A day student who withdraws later than two weeks after the beginning of any semester or session shall receive no refund of tuition for the half-semester or half-session in which the withdrawal occurs.

BOARDING STUDENTS:

1. A boarding student who withdraws within two weeks of his initial enrollment shall have refunded the tuition charge for that semester (or whatever amount has been paid by the student) less \$10.00; and shall have refunded also the amount paid for board and room minus the charge for one week in excess of his residence at the College.
2. A boarding student who withdraws later than two weeks after the beginning of any semester or session shall receive no refund for the half-semester or half-session in which the withdrawal occurs and will be charged for room and board for one week in excess of his residence at the College.

WHAT STUDENTS SHOULD BRING WITH THEM

Every student must furnish the following for personal use: bedroom slippers with soft heels, toilet soaps, bureau scarfs, blotter for study table, blankets, and a cover or spread for the bed.

STUDENT PERSONNEL SERVICES

Student Personnel Services are designed to supplement the academic program in developing the total individual. An attempt is made to coordinate all phases of student life. These phases include: physical well-being through student health, housing, and food facilities; social competence, through informal and formal social events; spiritual development, through participation in religious organizations both on the campus and in the community; individual adjustment, through orientation, guidance and counseling procedures.

LABORATORY SCHOOL FACILITIES

The State Teachers College at Salisbury utilizes, for its laboratories, one campus and several off-campus elementary and junior high schools. The Campus Elementary School gives instruction to elementary school children in all grades from one to six, inclusive. Observation and participation by student teachers begins with the junior year and continues throughout the junior and senior years.

The off-campus schools, located in cities of Berlin, Princess Anne, Salisbury, and Snow Hill, give instruction in all grades of the elementary and junior high school.

The 1950 Legislature appropriated \$454,000 for a separate demonstration school. Plans which include an auditorium, cafeteria, gymnasium, kindergarten, six classrooms, and a principal's office are being drawn.

LOAN FUNDS

THE EDNA M. MARSHALL MEMORIAL FUND:

The Edna M. Marshall Memorial Fund was established in June, 1935, as a living tribute to the memory of Edna M. Marshall, Ph.D., Director of Training and Principal of the Campus Elementary School from 1925 to 1933. It may be used only by worthy junior and senior students, and is available to the extent of from \$25 to \$150 per year. It is administered by a board whose membership includes two alumni and two members of the college faculty.

D. A. R. FUND:

The Samuel Chase Chapter of the Daughters of the American Revolution makes it possible for a limited number of students to secure needed loans at a low rate of interest.

FOUR-YEAR CURRICULUM LEADING TO THE B.S. DEGREE IN ELEMENTARY EDUCATION

The completion of the first two years of this curriculum with an average grade of "C" or better will enable a student to enter the two-year professional curriculum at the State Teachers College at Salisbury or to transfer, with junior standing, to most colleges and universities of Maryland and of other states.

DESCRIPTION OF COURSES

Art

Art 101, Fundamentals of Design MISS PURNELL
1 lecture and 2 double laboratory periods a week for 18 weeks. Semester credit, 3 hours.

The course comprises a study of the space arts from the point of view of balance, proportion, rhythm, and harmony, to develop an understanding of composition and design as expressed in several art materials.

Art 103-104, Mechanical Drawing MISS PURNELL
3 double laboratory periods a week for 36 weeks. Semester credit, 6 hours.

This is a course in constructional and scale drawing following engineering, architectural and mechanical trends. It trains in skill, accuracy and the proper use of mechanical drawing instruments.

Art 202, Composition MISS PURNELL
3 double laboratory periods a week for 18 weeks. Semester credit, 3 hours.

A course, which trains in all art skills, and the use of many art tools, namely pencils, crayon, chalk, pen and ink, and brushes. The course includes freehand sketching from objects and nature; skillful copying of pictures; lettering and perspective drawing.

Art 301, Fine and Industrial MISS PURNELL
1 lecture and 2 double laboratory periods a week for 18 weeks. Semester credit, 3 hours.

The objective of the course is to develop competence in art expression. To this end students are given practice in applying art principles to the everyday problems of home and community living. The evolution of representative art forms from primitive times to the present will be considered, so that students may gain a knowledge of this history of art and thereby develop interest and understanding of art in its relation to cultural values.

Art 302, Crafts MISS PURNELL
3 double laboratory periods a week for 18 weeks. Semester credit, 3 hours.

Experiences in the handling of many types of materials and the skills involved in the use of them. Creative ability and originality are prime assets. This course is especially valuable to those students who expect to do recreational activities with groups of children.

Art 403, History MISS PURNELL
3 lecture periods a week for 18 weeks. Semester credit, 3 hours.

This course will trace the development of architecture, sculpture, painting and the minor arts from primitive to modern times. Art ages and artists will be studied to show the progress made. The course will be motivated by the use of slides and other illustrative material.

Art 404, Interior Decoration MISS PURNELL
1 lecture period and 2 double laboratory periods a week for 18 weeks. Semester credit, 3 hours.

This is a course in house planning and decoration. Students learn how to make a house a livable home. The course includes floor plans, wall plans, room layouts, the uses of light, color, design, furniture and household furnishings. A brief study of furniture construction and styles and their uses, textiles and fabrics and all household accessories is included. Field trips to points of interest may also be included.

Education

Education 301, Principles of Teaching and Observation in the Elementary School DR. CARUTHERS

3 hours each week for 18 weeks. Semester credit, 3 hours.

This course is designed for third-year students who are just beginning their study of professional subject-matter. It has two major objectives: first, to develop general principles underlying classroom procedure; and second, to orient the student to age and grade levels.

The course will include such topics as lesson plans, types of instruction, discipline, interest, the unit plan of teaching, pupil adjustment, the learning process, organization of our public school system, etc. The student will be given limited participation in classroom instruction and activities.

The organization, presentation, and integration of the topics to be treated will be determined largely by the observation of, and the participation in, the instructional procedure in the laboratory-school room.

Education 302, Art in Elementary School MISS PURNELL

2 laboratory periods a week for 18 weeks. Semester credit, 1 hour.

The course includes laboratory activities, lecture, observations, and some teaching of art in the elementary grades. The time is utilized in learning to handle art materials and problems suitable to adaptation in the elementary school.

Education 303, Principles of Teaching in the Junior High School,

DR. BOSLEY

3 hours each week for 18 weeks. Semester credit, 3 hours.

This course is designed for third-year students who are beginning their study of professional subject-matter. It has two major objectives: first, to develop general principles underlying classroom procedure; and second, to orient the student to modern educational practices. It deals with the organization of public education in the United States, the function of the junior high school in the total educational program, guidance, child accounting, grouping, marks, marking systems, and the relation of the school to other agencies of the community, state, and nation.

Education 304A, The Junior High School Curriculum STAFF

3 hours each week for 18 weeks. Semester credit, 3 hours.

This course will include such topics as lesson plans, types of instruction, discipline, interest, the unit plan of teaching, pupil adjustment, the learning process, and curriculum types, including the core. The student will be given limited participation in classroom instruction and activities.

Education 304B, The Junior High School Curriculum STAFF

3 hours each week for 18, weeks. Semester credit, 3 hours.

This course accompanies the first semester of student teaching. It includes a functional treatment of such topics as planning instruction, classroom management, the appreciation lesson, the drill lesson, problem and project teaching, core teaching, socialized class procedure, directed study, and the evaluation of learning activities. Instruction will be given in the special methods, as mathematics, reading, science, and social studies, according to the background needs of the students.

Education 304C, The Junior High School Curriculum STAFF

3 hours each week for 18 weeks, Semester credit, 3 hours.

This is the culminating course in professional education for prospective junior high school teachers. It accompanies the final semester of student teaching, and thus draws upon this experience and all previous professional training in helping the student to develop a functional philosophy of education.

Education 307, Audio-Visual Materials and Methods DR. MATTHEWS

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

The philosophy underlying the use of audio-visual aids in modern classroom procedures forms the approach to this course. Types of aids and their relation to units of work in the elementary school curriculum and to the core curriculum in the junior high school are considered in a practical way.

Education 308, Music in the Elementary School DR. JESSIE FLEMING

1 hour a week for 18 weeks. Semester credit, 1 hour.

A course in the organization and procedures of music in the elementary grades. It is a program of the study of the child's development in music as an integrated experience. It includes a study of the child voice, song repertory, rhythm, pre-instrumental activities, dramatic play, discriminating listening, creative expressions, developing reading readiness, and choir procedures. Opportunities are given for surveying recent materials and equipment in the field, observing in the laboratory school, and practice in presenting some of the techniques discussed.

Education 310, Reading in the Elementary School DR. MATTHEWS

3 hours a week for 18 weeks. Semester credit, 3 hours.

The chief purposes of this course are to give students an appreciation of the values of reading, an understanding of the complex problems involved in teaching it at the varying levels in the elementary school, and a functional knowledge of the materials and techniques to use in helping children develop basic habits and skills in reading. Opportunity is given each student to study reading problems as they relate to actual learning situations in the laboratory school and, thus, to further the concept of reading as a "facet of language." Attention is given to experimentation in the field.

Education 312, The Teaching of Science in the Elementary School,

DR. M. FLEMING

2 hours each week for 18 weeks. Semester credit, 2 hours.

Problems, exercises, and discussion designed to improve the students' ability to use science in the achievement of aims of the elementary school. Consideration is given to the selection and organization of pertinent material from the fields of the natural sciences. Problems set up in the course are related to typical public school situations as they are known to exist in Maryland.

Education 314, Social Studies in the Elementary School DR. THOMAS

2 hours a week for 18 weeks. Semester credit, 2 hours.

This course is planned to prepare students to teach those social studies which are required in the elementary school curriculum. To that end, much practice is given in the selection of subject matter for the various grades of the elementary school, and in the organization of that subject matter into appropriate units of work. Opportunity is also given for the observation of social studies classes in the elementary school. Students are urged to make collections of pictures, stories, and other illustrative materials in the field of elementary school social studies.

Education 316, Art in the Junior High School MISS PURNELL

1 lecture period and 2 double laboratory periods a week for 18 weeks. Semester credit, 3 hours.

This course will apply art techniques and skills to the needs of the junior high school grades. Observation and teaching of art in the grades is encouraged.

Education 318, English in the Junior High School DR. MATTHEWS

3 hours a week for 18 weeks. Semester credit, 3 hours.

Attention is given to the problems in modern English usage with particular reference to classroom problems in teaching the language arts to

junior high school pupils. An attempt is made to show the value of "creative work" as a means of promoting skill and pleasure in communication. Students are given an opportunity to organize materials of instruction around centers of interest, and to understand children's learning problems through contact with the laboratory school. The principles underlying the teaching of language are thus developed in their functional relationships. Emphasis is placed on the self-development of each student in skills involved in oral and written language and in speech.

Education 320, Science in the Junior High School MR. GLENN
3 hours a week for 18 weeks. Semester credit, 3 hours.

Students are given experience in organizing and teaching science at the junior high school level. This training will include preparation for the three phases of such a science teacher's job; the teaching of science as a separate subject, participating in the core program, which includes Science, and serving as a consultant in science teaching. Student participation is emphasized and includes the planning of units. Wide application is made of the visual aids with the student gaining experience in their use with the class.

Education 322, Mathematics in Junior High School MR. CAUFFMAN
3 hours a week for 18 weeks. Semester credit, 3 hours.

Cooperative development of philosophy of mathematics in junior high schools of today with implications for content and method. Organization of teaching units, observation and evaluation of teaching in situations at junior high school level.

Education 323, Music in the Junior High School DR. JESSIE FLEMING
3 hours a week for 18 weeks. Semester credit, 3 hours.

A course in the organization and procedures of a music program for the adolescent youth. It includes its social and aesthetic aspects in relation to school and community life; choice, interpretation, methods of approach to, and presentation of standard and contemporary choral and instrumental music to unselected student groups for singing and listening. Materials and activities appropriate for the elective and specialized aspects of the music program; the changing voice; voice testing and part singing are given special attention. Emphasis is given to the general music program of the contemporary junior high school.

Education 325, Physical Education in the Junior High School,
MISS HOLLOWAY and MR. MAGGS
3 hours a week for 18 weeks. Semester credit, 3 hours.

A graded program of study of methods and materials for the teaching of Physical Education in junior high schools. Attention is given to an evaluation of achievement standards and techniques. The course is based on discussions, laboratory practice, observation and lectures.

Education 327, Juvenile Literature DR. MATTHEWS
3 hours a week for 18 weeks. Semester credit, 3 hours.

This course is planned especially for students preparing to teach in a junior high school. Students are guided to survey types of literature suited to junior high school pupils,—to study the reading interests of boys and girls, and to investigate methods of presenting materials in order that they may guide, stimulate, and direct the classroom periods and outside reading interests of their pupils with understanding. Opportunity is given for wide reading to enrich backgrounds for teaching and to heighten the pre-service teacher's appreciation of the best in literature.

Education 329, Social Studies in Junior High School DR. THOMAS
3 hours a week for 18 weeks. Semester credit, 3 hours.

This course is planned on somewhat the same lines and general principles as Education 314; i.e., the selection of social studies materials of

study and methods of their development in the junior high school. Particular attention will be paid to the activity phases suitable to the development of national and world understandings in the fields of history, geography, government and politics.

Education 401-402, Directed Teaching DR. CARUTHERS, DR. BOSLEY
MR. FOCHT* and DR. MATTHEWS

15 hours a week for 36 weeks. Semester credit, 16 hours.

Students are placed in directed teaching centers on the campus or in nearby public school systems. They have opportunities to observe teaching, to participate in work with children, to teach in the elementary and junior high schools, and to participate in many activities for which regularly employed teachers are responsible.

Besides participation and teaching, the work of the student teacher includes individual and group conferences with training teachers and supervisors. Guidance is given students in selecting materials, in organizing "units" for teaching purposes, and in interpreting them in terms of guiding children in the total educative process. Reasonable skill in teaching techniques is required of each student, and an effort is made to enable him to develop a teaching personality and an understanding of the principles of education in practice.

Education 403, Children's Literature DR. MATTHEWS
3 hours a week for 18 weeks. Semester credit, 3 hours.

Students planning to teach in grades one to six, inclusive, will enroll for this course. It is designed to enrich backgrounds for teaching literature. Topics selected for study include: the place of literature in the education of the child; literature in relation to units of work, and to the use of leisure time; a critical evaluation of standard and contemporary literature for ages six to twelve in relation to their interests at the different age levels; and a study of techniques of presenting materials so that children may develop a love of reading and of good literature.

Education 404, History and Philosophy DR. CARUTHERS
3 hours a week for 18 weeks. Semester credit, 3 hours.

The major objective of this course is to assist the student in the organization, interpretation, and evaluation of his professional experiences in the light of the origin and development of organized education

Education 405, Mathematics in the Elementary School.....DR. CARUTHERS
MR. FOCHT*
2 hours a week for 18 weeks. Semester credit, 2 hours.

The course emphasizes mathematics as the quantitative experience of the race, and is organized into three parts: first, the origin and development of the number system, the purpose of which is to give a basic understanding of the principles and practices of calculation; second, the methods of teaching the memorization of the necessary number facts and the four fundamental processes; and third, the social significance of mathematics, covering such topics as common and decimal fractions, percentage and its applications, area and volume, taxes, insurance, commission and other forms of income. Meaning is emphasized throughout the course.

Education 406, Psychology DR. MAY
3 hours a week for 18 weeks. Semester credit, 3 hours.

Educational psychology draws its content from four sources: the psychological laws and principles which have been identified and well verified by experience during the past fifty years; the laws of physical growth and development of children; the sociological laws and principles which have been identified and tested; and information relative to the nature of the human being.

* On military leave of absence

In procedure the child is made the center of consideration. Children are observed in groups and as individuals. As a technique of study, anecdotal records are secured and then analyzed on the basis of six major or basic areas. The chief aim of the course is to effect a direct bearing of all information upon the learning and developmental processes of the child.

Education 407, Reading Disabilities DR. MATTHEWS
2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

This course includes a study of the analysis and the correction of the common reading disabilities. The program of work includes: points of view regarding retardation; factors underlying the causes of reading difficulties; the relation of reading to growth; the selection of reading materials and techniques in relation to individual needs; and programs for corrective measures in a laboratory situation.

English

English 101-102, Composition MR. BURNET
3 hours a week for 36 weeks. Semester credit, 6 hours.

This course is intended to help the student write effectively, fully, and in a way appropriate to the subject, the situation, the reader, and himself. Assignments are given in detail, with emphasis on the writer's motive in communicating, his plan of organization, and his revisions. Individual help is given with every piece of writing. Though the course is centered around composition, it involves a comprehensive introduction to scientific grammar and research method, and some consideration of semantics and logic. Analyses in detail are made of contemporary exposition, argument, description and narration.

English 103, Speech MRS. BENNETT
3 hours a week for 18 weeks. Semester credit, 3 hours.

This course affords the student an opportunity to develop skill and poise in the oral presentation of thought. Each student delivers speeches before an audience of his fellows, and receives criticism upon his ability to analyze his subject, to select and arrange his ideas, to secure the interest and consent of his hearers, and to speak with simplicity, clarity, and correctness. Emphasis is placed upon pronunciation, enunciation, voice, phrasing, posture, platform manners, parliamentary procedure, and the organization of panel and other forms of group discussion. Individual oral interpretation of various selections from literature is required.

English 201-202, English Literature MRS. BENNETT
MR. BURNET
3 hours a week for 36 weeks. Semester credit, 6 hours.

In this course English literary history is presented through a detailed study of representative writings of great writers. Materials from Beowulf through Sheridan and from the Romantics through Thomas Hardy are included. Attention is given to types of literature and also to dominant continuing and recurrent trends in subject matter, movements, techniques, and social and literary philosophies.

English 206, World Literature MRS. BENNETT
3 hours a week for 18 weeks. Semester credit, 3 hours.

This course is intended to give a background for the study of English literature. It is a survey of European literary masterpieces from the earliest times to the present day. Intensive study is made of the *Iliad*, the *Odyssey* and of the plays of Aeschylus, Sophocles, Euripides and Aristophanes. Lyric poetry of Greece, Rome, and of modern continental countries is studied. The course is intended to bring students into touch with the masterpieces of world literature and with the conditions which produced them in order that they may read with better understanding their own literature.

English 301, American Literature MRS. BENNETT
3 hours a week for 18 weeks. Semester credit, 3 hours.

Special attention is given to the backgrounds that have made American literature a distinct growth. Types and ideas are stressed. Consideration is given to divergent movements and writers from the pre-Revolutionary papers of John Smith through contemporary materials by such authors as Steinbeck, MacLeish, and O'Neill.

English 402, Modern Comparative Drama MRS. BENNETT
3 hours a week for 18 weeks. Semester credit, 3 hours.

This is a study of European and American dramatists from Ibsen to O'Neill. The purpose of this course is to acquaint the student with the rise of the drama of ideas, to help him trace the modern movements of naturalism, symbolism, and expressionism, and to study the influences of one national drama upon another and to compare their techniques.

English 403, The Novel MRS. BENNETT
3 hours a week for 18 weeks. Semester credit 3 hours.

The Novel is a course in the critical and historical study of the growth and development of the English novel from its beginnings in the work of Defoe, Richardson, Fielding, and other major authors, to the modern novel. Emphasis is placed upon the types and techniques. Consideration of the novels as interpretations of human life and of political, social, and scientific movements is stressed. Investigation of modern attitudes and tendencies in fiction is also emphasized.

English 404, Play Production MR. BURNET
3 hours a week for 18 weeks. Semester credit, 3 hours.

An introductory survey of the technical aspects of producing plays, involving choice, analysis and casting of a script; acting and direction of several scenes from a play; all the paper work associated with designing and planning scenery, properties, costumes, lighting and makeup; practical work in building scenery, applying makeup and handling lighting equipment; examination of standard practices in business and house management, and in the organization of theatrical groups.

English 405, Shakespeare MRS. BENNETT
3 hours a week for 18 weeks. Semester credit, 3 hours.

This course is an intensive study of selected plays of Shakespeare with special attention to matters of textual criticism, characterization, dramatic technique, and of the biographical, literary, and theatrical background of the author's work.

Health and Physical Education

Health Education 102, Physiology MISS JAMART and MR. MAGGS
3 hours a week for 18 weeks. Semester credit, 3 hours.

This course attempts to help the student gain knowledge of the elements of anatomy and physiology which serve as a basis for understanding individual health practices; to recognize particularly his own health problems and those common to individuals of his age; and to prepare himself through knowledge of the structure and function of various tissues for the study of psychology and other courses in health education.

Health Education 402, The School Child MISS JAMART
3 hours a week for 18 weeks. Semester credit, 3 hours.

The course aims to acquaint students with the health needs of pupils and to prepare them to deal intelligently with common situations involving the health of pupils. The course covers the relation to the health of the school child of such environmental factors as sanitation of the school plant and the ventilation and lighting of school rooms; the importance of the

services of public health clinics and of close cooperation with the school physician and nurse, knowledge of the defects and diseases, communicable and non-communicable, frequently found among children of school age, methods of preventing some of the common infectious diseases, and practice in interpreting the medical records of pupils; the need for a well-balanced program of studies and physical activity during the school day; some understanding of the principles underlying health education in the elementary school and the selection of materials and methods appropriate for such teaching.

Health Education 403, Marriage and Family Relationships.....MISS JAMART and MR. FLEMING
2 hours a week for 18 weeks. Semester credit, 2 hours.

An investigation from the standpoint of the participant of the personal relationships involved in family life. These questions will be dealt with from the varying approaches of childhood education, home problems, physiology, psychology, and family status in social life.

Health Education 406, First Aid and Accident Prevention.....MISS JAMART
2 hours a week for 9 weeks. Semester credit, 1 hour.

To acquire knowledge and skills for the emergency care of the injured, and to create an active interest in the prevention of accidents through the elimination of causes. This course meets the requirements of the American Red Cross First Aid Courses. The certificate earned remains valid for three years.

Hygiene 404, Mental, Personal, and SocialDR. MAY, MISS JAMART and MR. FLEMING
3 hours a week for 18 weeks. Semester credit, 3 hours.

This course is cast into three areas, namely, mental hygiene, or individual psychology, personal hygiene, and social hygiene. Its chief aim is to develop a consciousness on the part of the student for the three-fold basis of healthful and happy living.

Mental hygiene will be based largely on individual psychology. Its main emphasis will be on the mental health of the normal individual with the purpose of making psychiatric treatment unnecessary. The course may thus be considered as preventive psychiatry. Principles of mental health will be developed and applied.

This course approaches the problems of individual health, through an analysis of the various forces that play upon the human organism. Emphasis is given to factors in personality, various responses to the problems of health, and application of scientific fact and principles of living.

The area of social hygiene is concerned with the problem of adjustment on the part of the individual to group living. Premarital, marital, and domestic problems are among those considered.

Physical Education 101-102, 201-202.....MISS HOLLOWAY and MR. MAGGS
2 hours a week for 36 weeks. Semester credit, 2 hours.

These courses provide an introduction to physical education activities and are planned to give the student a foundation for intelligent use of those activities, and for a systematic approach to other and more advanced activities. The courses should help the student to develop and maintain physical fitness; to develop personal ability in the fundamental skills and understanding of them; to develop game habits and understandings; to develop a method of learning skills and physical education activities; and to build a repertoire of physical education activities which he will use in teaching.

Physical Education 105-106, 205-206, Corrective,
MISS HOLLOWAY and MR. MAGGS
2 hours a week for 36 weeks. Semester credit, 2 hours.

These courses deal with the organization of programs and services in

individual corrective work in different type situations. Students not admitted to physical education classes because of remedial defects may enroll.

Physical Education 301-302 MISS HOLLOWAY and MR. MAGGS
2 hours a week for 36 weeks. Semester credit, 2 hours.

These courses outline the aims of physical education and give a brief history of physical education in the United States. Activities are planned to give the student actual practice for teaching. Subject matter is outlined for the elementary and junior high school. The material presented includes games for the playground and classroom, self-testing and rhythmic activities, posture and dramatic training.

Physical Education 401-402 MISS HOLLOWAY and MR. MAGGS
2 hours a week for 36 weeks. Semester credit, 2 hours.

These courses are a continuation of Physical Education 301-302. The chief topics are: play and what it means to the child; importance of organized play in school; organized games; athletics and social games; stunts and efficiency tests; track and field events; folk dancing; physical education as outlined for the State of Maryland; how to conduct a meet; how to conduct tournaments; good sportsmanship.

Physical Education 404 W, Folk Dancing MISS HOLLOWAY
3 hours a week for 18 weeks. Semester credit, 3 hours.

This course is sufficiently extensive to give the student a rich repertoire of dances of different nations. Progression for teaching the step combinations such as two-step, polka, waltz, and schottische will be presented and discussed. Provision will be made for the collection of background material for the presentation of folk dances. The course will include a study of natural characteristics, folk costumes, and a brief history of the dancing of each country as it is considered.

Physical Education 405, Supervised Activities MISS HOLLOWAY and MR. MAGGS
3 hours a week for 18 weeks. Semester credit, 3 hours.

The course is set up to provide an opportunity for the student to work with children in physical education. Adequate supervision is provided. Both observations and bibliography are used to supplement the directed activities.

Pre-requisite, Physical Education 101-102, 201-202.

Physical Education 406, Administration and Coaching.....MISS HOLLOWAY and MR. MAGGS
3 hours each week for 18 weeks. Semester credit, 3 hours.

The purpose of this course is to acquaint the prospective teacher of physical education activities with the areas of administration and coaching with which he will be most directly concerned.

Problems of administrative structure and procedure will be examined and discussed. The types of sports best suited to the age group taught will be studied as well as techniques necessary to those sports.

The course is designed to summarize the past experience and knowledge in the field of physical education, and to help the student prepare the material for practical use in a teaching situation.

Pre-requisite, Physical Education 101-102, 201-202.

Mathematics

Mathematics 101, College Algebra MR. CAUFFMAN
3 hours a week for 18 weeks. Semester credit, 3 hours.

Fundamental operations, functions and graphs, linear and fractional equations, quadratic equations, solution of systems of equations, including use of determinants, exponents and radicals, complex numbers, theory of

equations, binomial theorem, progressions, permutations and combinations, probability.

Pre-requisite: 1 or 1½ units in high school algebra.

Mathematics 102, Trigonometry MR. CAUFFMAN
3 hours a week for 18 weeks. Semester credit, 3 hours.

Trigonometric functions, logarithms, radian measure, graphs, solution of right and oblique triangles, equations, identities, inverse functions, elementary spherical trigonometry.

Pre-requisite, Mathematics 101 or 107A.

Mathematics 103, Arithmetic for Teachers MR. CAUFFMAN
3 hours a week for 18 weeks. Semester credit, 3 hours.

This is a course in arithmetic for mature students who are expected ultimately to teach the subject in elementary or junior high school. Beginning with historical concepts, the course includes a study of the fundamental processes, fractions and decimals, percentage, investment, insurance, denominate numbers, interest, square root, the right triangle formula, ratio, proportion, similar figures, measurement of angles, areas, and volume of simple geometric figures and solids, weight, capacity, and time.

Mathematics 104, Basic Algebra MR. CAUFFMAN
3 hours a week for 18 weeks. Semester credit, 3 hours.

This course is designed to qualify students to teach all mathematics through the junior high school, particularly Algebra. From study of the fundamental operations with signed numbers, through quadratics, emphasis is placed upon problem solving, and representation of unknown quantities by symbols. Ability to work with formulas is particularly emphasized.

This course presupposes no previous knowledge of Algebra. A student who satisfactorily completes it may proceed with Mathematics 101 or 107A.

Mathematics 105, Commercial Algebra MR. WEAVER
2 lectures and 1 two hour computation period a week for 18 weeks. Semester credit, 3 hours.

A practical course in college mathematics stressing particularly the application of algebra to problems in the field of business administration. Topics covered include: equations of the first degree, fractions, percentage and commercial transactions, exponents and radicals, logarithms, simple interest, and discount, quadratic equations, graphical representation, progressions, binomial theorem, permutations, and combinations, probability, statistics.

Pre-requisite, 1 year of high school algebra or the equivalent.

Mathematics 106, Mathematics of Finance MR. WEAVER
2 lectures and 1 two hour computation period a week for 18 weeks. Semester credit, 3 hours.

Mathematics for business administration students. Topics covered: compound interest and compound discount, annuities, perpetuities, capitalized cost, retirement of debts by installment payments, depreciation, valuation of income property, bonds and reinvestments, life annuities, life insurance, policy reserves.

Pre-requisite: Mathematics 105, or the equivalent.

Mathematics 107A, College Algebra MR. CAUFFMAN
3 hours a week for 18 weeks. Semester credit, 3 hours.

Fundamental operations, functions and graphs, linear and fractional equations, quadratic equations, solution of systems of equations, including use of determinants, exponents and radicals, complex numbers, theory of equations, binomial theorem, progressions, permutations and combinations, probability.

Pre-requisite: 1 or 1½ units in high school algebra.

Mathematics 107B, Trigonometry MR. CAUFFMAN
2 hours a week for 18 weeks. Semester credit, 2 hours.

Trigonometric functions, logarithms, radian measure, graphs, solution of right and oblique triangles, equations, identities, inverse functions.

Runs concurrently with Mathematics 107A.

Mathematics 108, Analytic Geometry MR. CAUFFMAN
4 hours a week for 18 weeks. Semester credit, 4 hours.

Rectangular and polar coordinates, the straight line, conic sections, graphs, parametric equations, transcendental functions, and solid analytic geometry.

Pre-requisite: Mathematics 107A and 107B, or Mathematics 101 and 102.

Mathematics 201, Differential Calculus MR. CAUFFMAN
4 hours a week for 18 weeks. Semester credit, 4 hours.

Variables, functions, limits, differentiation, critical points, applications of maxima and minima, differentials, simple integration and applications including fluid pressure, curvature, polar coordinates, mean value theorem, indeterminate forms.

Pre-requisite: Mathematics 108.

Mathematics 202, Integral Calculus MR. CAUFFMAN
4 hours a week for 18 weeks. Semester credit, 4 hours.

Integration as a process of summation, is its application to areas, volumes, arc length, centroids, moments and moment of inertia, infinite series including Maclaurin's and Taylor's series, prismoidal formula and Simpson's rule, hyperbolic functions, partial differentiation and multiple integrals.

Pre-requisite: Mathematics 201.

Music

Music 102, Fundamentals DR. JESSIE FLEMING
3 hours a week for 18 weeks. Semester credit, 3 hours.

A basic course designed to develop the musical skills, combining music theory, sight reading, vocal training, keyboard application, basic techniques of conducting, and music literature. Emphasis is given to those skills demanded of an elementary teacher.

Music 103, 204, 301, 404, College Chorus DR. JESSIE FLEMING
1 hour a week for 36 weeks. Semester credit, 1 hour.

The purpose of the College Chorus is to give any student interested in singing the opportunity to enjoy choral music; to develop musical ability, appreciation and taste; and to represent the college by performing as a whole or in small groups for civic and social gatherings in local and nearby communities, as well as in broadcasts and school assemblies, concerts, or other student and alumni affairs.

The College Chorus has a three-fold organization: Women's Glee Club, Men's Glee Club, and the combined choruses, known as the College Chorus. Smaller singing units are formed among the better singers.

Music 201, Appreciation-Survey DR. JESSIE FLEMING
3 hours a week for 18 weeks. Semester credit, 3 hours.

A survey course in music literature which aims to build a background that will give the average listener a better understanding and appreciation of the world's great music. The elements of music—rhythm, melody, and harmony—together with tone color and form, are discussed, and their significance in various compositions is illustrated. Types of the world's music are studied, including the great choral and symphonic compositions of Europe, United States, and Latin America. For transfer students only.

Music 202, Current DR. JESSIE FLEMING
3 hours a week for 18 weeks. Semester credit, 3 hours.

In this course a study of the trends in contemporary music is made. The approach is primarily appreciative, but historical data is employed in order to draw comparisons with earlier idioms and ideologies. The influence of jazz on the modern music is discussed. The period covered is essentially that from 1890 to the present. Opportunity is offered for each student to investigate topics of special interest to him.

Music 301, Literature DR. JESSIE FLEMING
3 hours a week for 18 weeks. Semester credit, 3 hours.

Designed primarily for students in the teacher education curricula. A study of the elements of music, rhythm, melody, harmony, form and tone color, together with their significance in the music of great composers. Selection of compositions for analysis is made from two points of view: First, great music of Western culture; second, music which may be used in the curricula of the elementary and junior high schools. Opportunity is given members of the class to investigate topics of special interest to them.

Music 402, Creative DR. JESSIE FLEMING
2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

This course is designed for students particularly interested in the creative aspects of music. A study is made of melody, harmony, and form. Original work is done by each student in setting words to familiar tunes, writing melodies and accompaniments for simple poems, and creating original songs, both words and music. Opportunity is offered for observation and experimentation in motivating creative music in the elementary school.

Music 403, History DR. JESSIE FLEMING
2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

The course in the history of music traces the development of music from the earliest times to the present. Changing theories of form and composition are studied. Outstanding compositions of major composers of the various periods are analyzed. The periods covered are essentially 2,000 B. C. to 1900 A. D.

Music 405, Recreational DR. JESSIE FLEMING
3 hours a week for 18 weeks. Semester credit, 3 hours.

Designed to include such elementary techniques of voice production, directing of group singing, and selection of material as will be of value to a recreational director. A compilation of song material will be made for general purposes as social and religious gatherings, camps, Scouting and similar organizations. Audio-visual aids and other devices to promote singing will be considered.

Psychology

Psychology 201, General DR. MAY
3 hours a week for 18 weeks. Semester credit, 3 hours.

A survey of the general principles underlying human behavior. The nervous system, perception, learning, emotion and personality are key points of emphasis. Experimental findings are constantly applied to practical situations.

Psychology 203, Nurses DR. MAY
2 hours a week for 18 weeks. Semester credit, 2 hours.

This is an introductory course in psychology especially organized for student nurses. The point of reference is regularly that of the student and practicing nurse and the environment in which their profession places them. Particular emphasis is given to problems dealing with physical, mental, and personality deviates.

Psychology 204, Applied DR. MAY
3 hours a week for 18 weeks. Semester credit, 3 hours.

This course makes application of research findings in psychology to problems encountered in everyday life. Problems in business, industry, advertising, labor-management, the professions, and social relations are given special consideration.

Psychology 206, Social DR. MAY
3 hours a week for 18 weeks. Semester credit, 3 hours.

In contrast to individual psychology, which considers human problems primarily from inner characteristics both native and acquired, social psychology gives major consideration to overt behavior as expressed in group situations. Emphasis is placed on the relation of the individual to the group, mass reaction and judgment, the principles of group control, and the social significance of the individual abilities and characteristics. The chief aim of the course is to enable the student to interpret social phenomena and to realize the impact of such on his own personality.

Psychology 208, Clinical DR. MAY
Psychology 301 Child Growth and Development DR. MAY
3 hours a week for 18 weeks. Semester credit, 3 hours.

A study of the behavior patterns characteristic of children at various stages of their development and the sources from which this behavior derives. Special emphasis is placed on the interrelatedness of the child's development. To increase the practicality of the course, each student is required to make a longitudinal study of a "normal" child.

Romance Languages

French 101 and 102, Elementary French DR. FRANCIS
3 hours a week for 36 weeks. Semester credit, 6 hours.

French 101-102 is planned for students who have had no previous study of French. The work of the two semesters covers the ground that is covered in two years of French in high school. An attempt is made to achieve balanced progress in the four phases of language use: namely, reading, writing, speaking and aural understanding of the language. At the same time, the students are introduced to France and the French people, their customs, and their cultural background.

French 103 and 104, Conversation Laboratory DR. FRANCIS
2 hours a week for 36 weeks. Semester credit, 2 hours.

This course is planned as 2 hours of laboratory practice with 1 hour of outside study each week. A concentrated attempt is made to achieve good pronunciation and intonation. Phonograph records are used extensively for the students to imitate. Conversational facility is furthered through imitation and memorization of everyday types of sentences and expressions. The course does not include a study of grammar except insofar as incidental grammatical explanations may be needed for the correct practicing of sentences.

This course is recommended as a supplementary course both for students in the beginning course, French 101-102, and also for those students in Intermediate French who have not yet acquired an excellent French pronunciation.

French 111 and 112, Intermediate DR. FRANCIS
3 hours a week for 36 weeks. Semester credit, 6 hours.

This course is planned for students who have passed either two years' work in French in high school or a one-year elements course in college with a grade of C or better.

A Major part of the work comprises a review of French grammar and composition, with special attention to idiomatic usages, plus the acquirement

of ready facility in understanding both written and spoken French. The reading texts used vary from year to year according to the interests of the students in the class, but they are so chosen as to add to the student's knowledge of France and the French people.

French 113 and 114, Intermediate Conversation Laboratory.....DR. FRANCIS
2 hours a week for 36 weeks. Semester credit, 2 hours.

Intensive practice in oral facility and aural comprehension on the intermediate level.

French 201 and 202, Advanced French ReadingsDR. FRANCIS
3 hours a week for 36 weeks. Semester credit, 6 hours.

An introduction to French literature, made through study of selected texts of literary value, is combined with increased achievement in rapid reading, understanding of more difficult idiomatic patterns, and greater fluency in speaking and in aural comprehension of French.

Prerequisite: Intermediate French or four years of high school French.

French 203 and 204, Advanced Conversation Laboratory.....DR. FRANCIS
2 hours a week for 36 weeks. Semester credit, 2 hours.

Intensive practice in oral facility and aural comprehension on the advanced level.

Spanish 101 and 102, Elementary SpanishDR. FRANCIS
3 hours a week for 36 weeks. Semester credit, 6 hours.

This course is planned for students who have had no previous study of Spanish. The work of the two semesters covers the ground that is covered in two years of Spanish in high school. An attempt is made to achieve balanced progress in the four phases of language use; namely, reading, writing, speaking and aural understanding of the language. At the same time an attempt is made to introduce the students to the life and cultural backgrounds of the Spanish-speaking people, both in Spain and in Spanish America.

Spanish 103 and 104, Conversation LaboratoryDR. FRANCIS
2 hours a week for 36 weeks. Semester credit, 2 hours.

This course is planned as 2 hours of laboratory practice with one hour of outside study each week. A concentrated attempt is made to achieve good pronunciation and intonation. Phonograph records are used extensively for the students to imitate. Conversational facility is furthered through imitation and memorization of everyday types of sentences and expressions. The course does *not* include a study of grammar except insofar as grammatical explanations may be needed for the correct practicing of sentences.

This course is recommended as a supplementary course both for students in the beginning course, Spanish 101-102, and also for those students in Intermediate Spanish, who have not yet acquired an excellent Spanish pronunciation.

Spanish 111 and 112, Intermediate.....DR. FRANCIS
3 hours a week for 36 weeks. Semester credit, 6 hours.

This course is planned for students who have passed either two years' work in Spanish in high school or a one-year elements course in college with a grade of C or better.

A major part of the work comprises a review of Spanish grammar and composition, with special attention to idiomatic usages, plus the acquirement of ready facility in understanding both written and spoken Spanish. The reading texts used vary from year to year according to the interests of the students in the class, but they are so chosen as to add to the students' knowledge of Spain and the Spanish American countries, their people, their customs, and their cultural backgrounds.

Spanish 113 and 114, Intermediate Conversation Laboratory.....DR. FRANCIS
2 hours a week for 36 weeks. Semester credit, 2 hours.

Intensive practice in oral facility and aural comprehension on the intermediate level.

Spanish 201 and 202, Advanced Spanish Readings.....DR. FRANCIS
3 hours a week for 36 weeks. Semester credit, 6 hours.

An introduction to Spanish thought, made through study of selected texts of literary value, is combined with increased achievement in rapid reading, understanding of more difficult idiomatic patterns, and greater fluency in speaking and in aural comprehension of Spanish.

Prerequisite: Intermediate Spanish or four years of high school Spanish.

Spanish 203 and 204, Advanced Conversation Laboratory.....DR. FRANCIS
2 hours a week for 36 weeks. Semester credit, 2 hours.

Intensive practice in oral facility and aural comprehension on the advanced level.

Science

Anatomy 101, Physiology.....DR. M. FLEMING
2 hours lecture and 2 double laboratory periods a week. Semester credit, 4 hours.

Study of the structure and function of the various cells, tissues, organs and systems of the human body, with emphasis on their integration in the formation of the human organism. Provides a course especially designed for student nurses and pre-nurses, or health education majors and is therefore also suitable for others who intend to major in some branch of the biological sciences. Instruction involves lecture, demonstration, discussion and laboratory work. Use is made of a human skeleton, a model of the human torso, and of the preserved cat, together with other laboratory materials. All study is directed toward a better understanding of the human body and how normal functioning can best be maintained.

Biology 103N, MicrobiologyDR. M. FLEMING
1 lecture-discussion period and 1 double laboratory period per week for 18 weeks. Semester credit, 2 hours.

Consideration of the microbes which are of particular interest to prospective nurses and those expecting to major in some phase of the biological sciences. Laboratory work includes study of the microorganisms as they grow under both artificial and natural conditions.

Biology 202, HumanDR. M. FLEMING
1-2 hours a week for 18 weeks. Semester credit, 1-2 hours.

Lecture demonstrations and discussion of the growth and development of the human body. Special emphasis is placed upon developing desirable understandings as to the biological basis of human behavior. Consideration is given to the individual through embryology, the infant period, early childhood, the school years, and adulthood. Especially designed to provide persons who are to work with children with a better comprehension of the biological forces which tend to cause the individual to grow, develop, and behave as he does.

Biology 302, NutritionDR. M. FLEMING
2 hours each week for 18 weeks. Semester credit, 2 hours.

Review of digestion and assimilation in humans with emphasis on the needs and reactions of the body to foods of various types and amounts. Special consideration is given to the food requirements of growing children.

Problems involving the selection and preparation of food as related to family and community health are included.

Botany 102, General DR. M. FLEMING
2 lectures and 2 double laboratory periods a week for 18 weeks. Semester credit, 4 hours.

This course consists of the study of the relationship of the plant groups and also of the anatomy and physiology of the seed plants. The chief aim is to present the fundamental biological principles of plant life and to provide a cultural background for the student. The nature and aim of the biological sciences, their methods, and the value of their results are also presented.

Botany 204, Field DR. M. FLEMING
1 lecture and 1 three-hour laboratory period a week for 18 weeks. Semester credit, 2 hours.

This course is designed to acquaint the student with plants in their natural habitat and the factors affecting their growth. Practice will be provided in the identification of representatives of the divisions of the plant kingdom. Special attention will be given to the identification of wild flowers, trees, and shrubs.

Chemistry 101, General MR. GLENN
2 lectures and 2 three-hour laboratory periods a week for 18 weeks. Semester credit, 4 hours.

This course deals with the subject matter usually included in general chemistry. It is organized on a basis of the broad principles of the subject rather than a detailed description of the elements. The principles studied are extensively illustrated with descriptive matter which in this course deals chiefly with the characteristics of the non-metals. The laboratory experiments are selected to give the student practice in the application of the principles. Quantitative relationships are stressed in the laboratory work.

Chemistry 102, General MR. GLENN
2 hours lecture and 2 three-hour laboratory periods a week. Semester credit, 4 hours.

This is a continuation of Chemistry 101. The course continues to deal with principles, and industrial applications rather than pure descriptive matter. This course includes a study of the characteristics of the metals. The compounds of carbon with their application to nutrition and the field of synthetic chemicals are given special attention. An introduction to systematic qualitative analysis is included.

Chemistry 103N, MR. GLENN
1 lecture and 1 two-hour laboratory period for 18 weeks. Semester credit, 2 hours.

This course deals with selected elementary principles of inorganic, organic and physiological chemistry and microbiology. Both the lectures and laboratory are organized to aid the student in developing understandings, which are applicable to nursing, rather than to trained technicians. The course is intended primarily for nurses in training, and for students enrolled in the pre-nursing curriculum.

Chemistry 105, Introductory MR. GLENN
2 lectures and 2 two-hour laboratory periods a week for 18 weeks. Semester credit, 3 hours.

A course similar in content to Chemistry 101, but placing more emphasis on the application of the fundamental principles and less on advanced theory. It is organized to meet the needs of students in general education, industrial arts, nursing, home economics, and physical education.

Chemistry 106, Introductory MR. GLENN
2 lectures and 2 two-hour laboratory periods a week for 18 weeks. Semester credit, 3 hours.

This course is a continuation of Chemistry 105. In addition to the industrial application and metallurgy of the most common metals, special emphasis is placed on elementary physiological chemistry.

Chemistry 203, Qualitative Analysis MR. GLENN
2 lectures and 2 three-hour laboratory periods a week for 18 weeks. Semester credit, 4 hours.

The principles of Chemistry studied in Chemistry 101-102, are applied to the detection of the common metallic and nonmetallic ions. The course is recommended for students who are preparing to study agriculture, chemical engineering, dentistry, medicine, medical technology, and veterinary medicine.

Chemistry 204, Quantitative Analysis MR. GLENN
2 lectures and two three-hour laboratory periods a week for 18 weeks. Semester credit, 4 hours.

A brief course in the fundamentals including laboratory study of selected typical gravimetric and volumetric procedures. Recommended for students entering the professions listed under Chemistry 203.

Geology 201, Principles MR. MARTIN
3 hours a week for 18 weeks. Semester credit, 3 hours.

The course deals with physical geology: ground water, gradation of wind, water, and ice; lakes and marshes; the ocean; minerals; rocks and their origin; vulcanism; diastrophism; metamorphism; and a brief introduction to historical geology. At least two field trips will be made during the semester.

Meteorology 102, Principles MR. MARTIN
3 hours a week for 18 weeks. Semester credit, 3 hours.

This course deals with the mechanics of circulation of the atmosphere and the effects of solar radiation and surface irregularities; the equipment to measure the weather elements and the symbols and codes for recording them; and the basic principles of forecasting, and the services rendered thereby.

Physics 101-102, Elements MR. WEAVER
2 lectures and 1 three-hour laboratory period a week for 36 weeks. Semester credit, 6 hours.

First Semester: Mechanics, heat and sound. Second semester: Light, magnetism, electricity, and a brief introduction to nuclear physics.

This course is designed primarily for students who plan to take agriculture, home economics or industrial arts, but is open to all who have had high school algebra.

Physics 201-202, Fundamentals MR. WEAVER
3 lectures and 1 three-hour laboratory period a week for 36 weeks. Semester credit, 8 hours.

First semester: Mechanics, heat and sound. Second Semester: Light, electricity, magnetism, and a brief introduction to nuclear physics.

This course is designed to give the student insight into the use and development of the important physical laws and theories. It is designed primarily for pre-dental and pre-medical students, but is open to all who have an adequate mathematical background.

Pre-requisite, Mathematics 101-102 or the equivalent.

Physics 203-204, General MR. WEAVER
2 lectures, 2 recitations, and 1 three-hour laboratory period a week for 36 weeks. Semester credit, 10 hours.

The course is designed primarily for students planning to take engineering or specialize in physics or chemistry. First semester: Mechanics and heat and sound. Second semester: Light, magnetism, electricity, and a brief introduction to electronics, atomic structure, radioactivity and nuclear physics.

Pre-requisite, Mathematics 107, 108, and concurrent enrollment in Mathematics 201, 202.

Science 101-102, Biological DR. M. FLEMING
2 lectures and 1 double laboratory period a week for 36 weeks. Semester credit, 6 hours.

Development of correct knowledges, understandings and generalizations as to man's place in the living world of plants and animals. Special emphasis is given to applications of biology to the problems of life in general and particularly to those problems of child growth and development to which biological science can make a definite contribution. Instruction includes lectures, demonstrations and discussions together with laboratory work and field study. Provides the biological subject matter needed by the student who is to teach in the elementary or junior high school.

Science 201-202, Physical MR. GLENN and MR. WEAVER
2 lectures and 1 three-hour laboratory period a week for 36 weeks. Semester credit, 6 hours.

These courses are designed to give a broad acquaintance with the various fields of the physical sciences. Their primary aims are to increase awareness of physical phenomena and to show how the understanding and interpretation of these phenomena contribute to our living. Their materials are selected from the fields of astronomy, earth sciences, physics, and chemistry. They cut across the boundaries of these fields, in order to bring out their relationships and to provide a background for the appreciation of the cooperative nature of the scientific advances of today.

Zoology 101, General DR. M. FLEMING
2 lectures and 2 double laboratory periods a week for 18 weeks. Semester credit, 4 hours.

The aim of this course is to acquaint the student with the general biological principles through the study of the anatomy and physiology of the representatives of the animal kingdom. It is designed to provide a cultural background as well as a foundation for courses in psychology and sociology. The student is also made acquainted with the relationship of the biological sciences and the general application of the principles developed in the study of zoology.

Zoology 203, Field DR. M. FLEMING
1 lecture and 1 three-hour laboratory period a week for 18 weeks. Semester credit, 2 hours.

The purpose of this course is to study the relation of animal life to the environment. In addition, the student will study the behavior and identification of the common insects, birds, mammals, etc. Some attention will be given to the care of animals in the class room.

Prerequisite, Science 101-102 or Zoology 101.

Social Sciences

Business Administration 101-102, Organization and Control.....MR. FLEMING
2 hours each week for 36 weeks. Semester credit 4 hours.

A survey course of the organization of business enterprise. Examination is made of internal and functional organization, and followed by a survey of industrial and management control.

Economics 101-102, Economic Development MR. FLEMING
2 hours a week for 36 weeks. Semester credit, 4 hours. Open to freshmen.

An introduction to present day economic systems, their origin and development. Western Europe and United States are areas emphasized.

Economics 201-202, Principles MR. FLEMING
3 hours a week for 36 weeks. Semester credit, 6 hours.

A general analysis of the economic system. The larger part of the course considers basic concepts and principles. A large part of the second semester's work is concerned with modern problems of the economic system.

Prerequisite, sophomore standing.

*Economics 203-204, Introductory Accounting**
4 hours each week for 36 weeks. Semester credit, 8 hours.

This course is a digest of the rules of credit and debit, the underlying principles of accounting records, simple partnership and corporation problems, and the preparation of financial statements.

Economics 401, Conservation of Natural Resources MR. FLEMING
2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

The course deals with the vital problems of the conservation of soils, minerals, forests, wild life and inland waters resources. Local applications will be stressed with field trips.

Economics 402, Consumer MR. FLEMING
3 hours a week for 18 weeks. Semester credit, 3 hours.

An analysis of the place of the consumer in our economic society; consumer demands; the need for customer education for effective consumption; and agencies cooperating to aid the consumer. Specialists in the various topics are guest lecturers. Special problems are assigned.

Geography 201-202, Elements MR. MARTIN
3 hours a week for 36 weeks. Semester credit, 6 hours.

This course comprises a study of the factors of the natural environment, their interactions, and their appraisal and utilization by man to satisfy his needs. It aims to build an appreciation of the types of civilization which have developed in different environments and of the ways in which the natural balance can be disturbed through the productive and exploitative activities of mankind. A study of the earth as a whole and in its relation to other bodies in the solar system forms an integral part of this course. A thorough study of the diverse regions of the world is made, with emphasis on the inter-relationships between plant, animal, and human life and the natural environment. Map readings and interpretation are stressed as tools of geographical thinking and expression.

Geography 203-204, Economic MR. MARTIN
2 hours a week for 36 weeks. Semester credit, 4 hours.

A world survey and analysis of agriculture, manufacturing, transportation, trade, mining and forestry.

Geography 302, Regional Geography of the United States and Canada,
MR. MARTIN
3 hours a week for 18 weeks. Semester credit, 3 hours.

A regional study of the United States and Canada, emphasizing physical and cultural relationships.

* Pending approval.

Geography 304, Regional Geography of Europe MR. MARTIN
3 hours a week for 18 weeks. Semester credit, 3 hours.

A study of the economic, political, and physical geography of the European countries.

Geography 306, Regional Geography of the Far East MR. MARTIN
3 hours a week for 18 weeks. Semester credit, 3 hours.

A study of the economic and physical geography of the Far East, with emphasis on Japan, China and India.

Government 101, American MR. FLEMING
3 hours a week for 18 weeks. Semester credit, 3 hours.

A basic course in the governments of the United States. A comprehensive study is made of the federal government, the state governments, and local governments. Some time is given to probable causes of changes in government.

History 101-102, European DR. THOMAS
3 hours a week for 36 weeks. Semester credit, 6 hours.

These courses trace the development of European man as a social being from the time of the early Mediterranean civilizations to the present day. Much attention is given to a discussion of the political, social and economic developments during the twentieth century.

History 201-202, American DR. THOMAS
3 hours a week for 36 weeks. Semester credit, 6 hours.

These courses offer a comprehensive survey of the political, economic, social, and cultural forces which have shaped the pattern of life in the United States. Sources of particular problems are uncovered and the present status of these problems is viewed in the light of their historical development. Special emphasis is placed upon the origins and development of American democracy.

History 401, American Diplomacy DR. THOMAS
3 hours a week for 18 weeks. Semester credit, 3 hours.

An historical study of the diplomatic negotiations and foreign relations of the United States from 1776 to today.

Open to upperclassmen only.

History 402, International Relations DR. THOMAS
3 hours a week for 18 weeks. Semester credit, 3 hours.

The course uses United States international relations as its core, stressing recent events. It discusses United States foreign policy with particular attention to world events of the twentieth century. It is assumed that the student possesses a fair knowledge of the political and social history of the United States and of Europe. A carefully documented research paper is an integral part of the class work.

Sociology 102, American Life MR. FLEMING
3 hours a week for 18 weeks. Semester credit, 3 hours.

A general analysis of the social structure, the large and small urban and the rural communities; the composition and distribution of population; and the social institutions and organizations.

ORGANIZATIONS

STUDENT GOVERNMENT

The purpose of the Student Government Association is to give the students a definite responsibility in governing themselves. This responsibility is ascribed to by each student. The Association is composed of all students. The officers are elected from and by the student body. The Executive Council is comprised of those officers, presidents of the respective organizations, and two faculty representatives, elected annually by the faculty.

THE ALUMNI ASSOCIATION

The Alumni Association, the object of which is the advancement of the interests of State Teachers College at Salisbury, was organized in June 1926, with the graduation of the first class of thirty girls.

The aim of this Association is to keep alive among members the professional ideas and the friendly contacts developed during their college years.

The activities of the Alumni Association originate from two different sources: those growing out of the actual needs of the association as it continues to grow; and those developing from the various class anniversaries.

Some examples of the activities which have been carried on are: contributions to the Edna M. Marshall Memorial Fund, organization of county chapters of the Alumni, and two general alumni meetings each school year, one in June and the other in October. Each June graduates are inducted into the ranks of the alumni by an impressive ceremony at sunset on the front steps on the day before commencement. The October meeting is devoted largely to the business of the association; and perhaps the most enjoyable feature of both meetings is the Alumni Dinner where old friends greet each other and new friendships are formed.

As they go about their classroom duties, they are often reminded of happy events and pleasant hours spent during student days. Homecoming in the fall and Alumni Day in May become an eagerly anticipated occasion to those who remain ever loyal to their Alma Mater and the classes of which they were a part.

THE ATHLETIC ASSOCIATION

The Athletic Association consists of two branches, a men's association and a women's association. Each group has its own officers. The women's athletics in the school include hockey, basketball and other major sports. The women also take part in the Athletic Exhibition, which is the major event. The men's athletics include four major sports: soccer, basketball, baseball

and track, and, in addition, tennis, softball, gym work, boxing and wrestling. Each year intramural games are played in each of the four major sports.

THE COLLEGE CHORUS

The College Chorus has as its purpose the development of those aesthetic principles which surround the artistic expression of the voice and the development of ability, appreciation and taste. Qualifications for membership are: interest in music, musical ability, and satisfactory scholastic standing.

THE CHRISTIAN ASSOCIATION

The Christian Association has charge of the religious activities of the school. Weekly vespers, planned and conducted by the students, are held on Sunday evenings at 5:45 o'clock. The purpose of this association is to maintain a Christian and friendly atmosphere among the students.

The Association cooperates with the Student Christian Movement in the Middle Atlantic region.

THE WOMEN'S DORMITORY ASSOCIATION

All women students who live in the college dormitory automatically become members of this association. The object of the organization is to cooperate with the Student Government in regulating matters pertaining to the resident life of its members. It aims to further the spirit of unity, to provide opportunity for members to assume more responsibility toward each other, to maintain high social standards, to encourage high scholarship achievement and to promote a friendly and wholesome atmosphere in the life at the college.

ASSEMBLY COMMITTEE

A school assembly is held bi-monthly on Thursdays during the school year under the direction of the Assembly Committee. This Committee consists of two student officers elected by the student body and a faculty advisor elected by the faculty. These assemblies offer an excellent opportunity for uniting the entire student body at the same time, since no classes are scheduled for this period. The function of the committee is to provide entertainment for the relaxation of everyone and to allow students and student-groups to perform.

FUTURE TEACHERS OF AMERICA

The Future Teachers of America is a local, state and national organization. It is a branch of the National Education Association and provides members with the opportunity to become acquainted with problems in the local, state and national educational fields and the opportunity to participate in projects directly related to these problems. These opportunities are invaluable as preparation for leadership in the educational fields.

The local chapter of the Future Teachers of America was organized during the school year of 1945-46, and is known as the Albert S. Cook Chapter. Meetings are held twice a month, and programs of benefit and interest to all are presented. Any student enrolled in the college is eligible for membership.

THE PUBLICATIONS STAFF

One of the oldest organizations of the college, the Publications Staff has served as the medium through which the activities of the State Teachers College has been recorded, and as a means for voicing student opinion in every phase of collegiate life.

The aim of the staff is to provide a complete coverage of all the latest college news as well as to provide a record of college life for the students and alumni for the years to come. With the counsel of a faculty advisor, the work carried on by the editors, the reporters, a business manager and the advertising solicitors this aim is accomplished through the publication of the college annual, *The Evergreen*, and the monthly paper, *The Holly Leaf*.

THE SOPHANES PLAYERS

The student dramatic organization of the State Teachers College, the Sophanes Players, produces one major production for the public and several shorter plays or radio scripts each year. Members work as actors, directors, carpenters, electricians, make-up technicians and as workers in the business aspects of production. Any student of the College may become a member.

THE PHOTOGRAPHY CLUB

The Photography Club attempts to give its members opportunities for creative expression in the field of photography, to further scientific study in this field and to cooperate with the Publications Staff in securing photographs of campus life for publication. Membership is open to anyone who is interested in photography.

THE MEN'S DORMITORY ASSOCIATION

All men who reside in the college dormitory automatically become members of the Association. The purpose of the organization is to promote a suitable atmosphere for study and relaxation. To accomplish this end the group has developed certain rules and regulations which are enforced by the members. The Association operates under the overall supervision of the Student Government and the administration. Its officers normally serve for a period of one year. The president is elected the previous May but the other officers are elected in the fall when new members are present and therefore able to vote and hold office.

THE WOMEN'S DAY ASSOCIATION

The Women's Day Association is an organization of the commuting women students of the college. The primary aim of this

association is to promote wider acquaintance and friendship among the faculty and student body. Special rooms, equipped with lockers for books and materials, racks for coats, day-beds, and lounges are provided such students. Each day student is responsible for keeping the room in good order.

THE MEN'S DAY ASSOCIATION

The Men's Day Association comprises all men of the college, who do not reside in the dormitory. Membership in the organization is automatic when registering for college classes. Its function is to promote the physical, social, and academic well being of all men and to assist in the solution of any problems arising within the group. The Men's Day Association plays a large part in moulding student morale and in sponsoring policies for the general welfare of the college.

SOCIAL COMMITTEE

The Social Committee is composed of one representative elected from each class and a General Chairman elected by the Student Government and a faculty advisor. The Committee schedules social functions, arranges with organizations to sponsor dances, teas and parties, acts as sponsors for entertainment and programs, and allocates the funds for the total social program of the college.

The Snack Bar

The Student Store
